Projects

Netflix Ruby on Rails, React.js, Redux.js, PostgreSQL

[Live](#) | [GitHub](#)

A RESTful single-page app that applies a JSON API, inspired by Netflix.com

- Linked MVC back-end with React to enable users to like videos & add them to personal list
- Utilized AJAX calls to retrieve videos/reviews and provide a categorized index of videos
- Combined header and category components for browsing by category and accessing user list
- Incorporated Paperclip library & AWS into back-end for video and image implementation

BrickOut JavaScript, Canvas

[Live](#) | [GitHub](#)

A browser game inspired by Brick Breaker

- Applied collision detection by applying geometric calculations w/ JavaScript functions and harnessed by adding power-ups that alter mid-game difficulty
- Implemented event listeners for game controls, recursively calling RequestAnimationFrame to update screen before next repaint

jControl Document Object Model API, JavaScript

[GitHub](#)

A JavaScript library for streamlined DOM manipulation, event handling, and AJAX

- Leveraged DOM API for handling dynamic HTML, and XMLHttpRequests for server requests
-

Skills

Ruby
Rails

JavaScript
jQuery

React.js
SQL

Redux.js
Git

HTML
CSS
